MEMORANDUM FOR: Chief of Staff, USAF  
Attn: Director of Intelligence.

SUBJECT: Unidentified Flying Object Sighting.

1. In reply to your request for information concerning a reported sighting of an unidentified flying object, you are advised that at approximately 19:10 in 23 December 1950, my wife, my son and I were proceeding from my quarters at Earnest Harmon Air Force Base, Stephenville, Newfoundland, to the Officers Club. It was a clear cloudless night, with a full moon which was almost directly overhead. The visibility was exceptional and estimated at 30 miles or more. Suddenly a cloud appeared approximately 10 degrees of the moon, it began abruptly as a thin contrail type cloud appearing from the outer atmosphere. As the cloud form descended the contrail became heavier, then changed to grey and progressed into black. The cloud extended from the vicinity of the moon and disappeared beyond the horizon to the west. It had no visible movement, but apparently appeared all at once. I received reports from base operations, from the weather bureau, and from the control tower where other persons had observed the same phenomenon.

2. The crew of the C-82 aircraft returning from Sunnyside to Earnest Harmon observed this same phenomenon, with the addition that they saw the contrail pass overhead and disappear to the westward in a flash of white light, apparently in the Gulf of St. Lawrence. A reporting of this sighting was made to headquarters, NEAC. No evaluation of this sighting has been received.

*Clayton E. Hughes*  
CLAYTON E. HUGHES

Colonel, USAF  
Chief, O & T Branch, AFD.

In May 1951 Col. Clayton Heigher, in company with his wife, was leaving the officers club at Farnon AFB and were enroute to quarters. After driving about four blocks, then turning south, Mrs. Heigher called the attention of Col. Heigher a peculiar type of cloud formation; Col. Heigher <sup>saw it through</sup> continued to observe ~~it~~ as he drove on to quarters. The time of the sighting was 2355.

In getting out of the car further observation was made. There appeared to be four objects or formations <sup>in line</sup> below and about 10% to the west of the moon and very high. The formations <sup>were described as being</sup> seemed to have the approximating density of cotton and appeared to a crystal white in color.

Within a minute or two of the first observation, the formations moved to a position directly under the moon and three of the objects spread out and appeared to form the letter W.O.N. The clouds around it could not be seen.

The entire observation lasted for a period of five or six minutes before the formation designated disappeared from view.

cont

In order to verify the sighting, Col. Kegler had called his deputy, who had in turn sent word and apparently sighted the same phenomena.

Col. Kegler reports that Gen. Whitten, observing from another point, took the same flight. Had observed a similar type formation at 0015 hrs, twenty minutes after the first sighting. Gen. Whitten's sighting was in the same relative position, and the cloud was in the form of an arrow.

~~Recent~~ Conversation with Gen. Whitten indicates that some misunderstanding exists in connection with this statement. Gen. Whitten does not say he saw anything but that the report was made to him by Hughes.

~~there~~ be the absence of report -

9:45, we counted 5 shooting stars, these stars seemed to be disturbed by the object & were shooting in the general location of it. The last star that fell was a very large one: B. The object was app. at X when we looked back to the northeast, there

we saw 4 more objects following the path of the first. These were closer together, but not as brilliant nor as large as the first. Neither did they move around as much, but seemed to stay on a straighter course. These were of a blue-white brilliance & seemed to travel at the same rate of speed.

This incident I called you on  
today happened 19 Dec 1951. - Observed  
at Harmon AFB - 2210 PM - Clear night -  
full moon - Object in form of "contrail"  
Color: white disappeared to west.

I got this info from Col Clayton Hughes  
who reported the sighting to Gen Walker  
by telephone who was then CG AFAC.

Hughes stated info was sent to HQ USAF  
by fax & full report by letter.

This might help me find this  
reported UFO.

7:00 pm approx. CST

On Dec. 31, '51, we were in [REDACTED], Ky. Sitting on the porch, we saw this brilliant, red-orange object above the tree tops. We saw in the beginning that its brilliance & movement was unlike any of the stars. The object seemed to come forward then go farther away. It flashed like a large diamond, with a blue-white brilliance, & flashes of yellow, red-orange & green. It seemed to "dance" as if it was bouncing on a rubber band. App. 7:45, it appeared to go so far away that it was hardly visible, after a few seconds it became larger & more brilliant again. From 8PM till 8:45 it would get bright & dim, but not so quickly.

From then until we could no longer see it, it seemed to remain the same size & color, & staying on a straighter course. Between 9PM & 9:45 several stars fell. Within a few seconds, about

9:40, we counted 5 stars seemed to be & were shooting in front of it. The last star large one: B. The object we looked back to tr

This was Central Standard Time. The sky was dark & clear & all the stars were visible. That is why we could definitely tell that the objects were so much different.

There were 9 of us witnessing this spectacle until 9PM. My husband & I continued watching until 10PM.

Mr. & Mrs. [REDACTED], Mr. & Mrs. [REDACTED]

Mr. & Mrs. [REDACTED]

& ourselves, Mr. & Mrs. [REDACTED].

MEMORANDUM FOR RECORD

SUBJECT: Reference Investigation of UFO Report 19 December 1951

24 Dec 1951

1. I called General Witten at Olmstead who was away on a trip, no contact.

2. I called Colonel Hughes, Rm 3E253, Pentagon, Tel 52061, National Guard Bureau. I explained to Colonel Hughes the purpose of the call and he gave me the following information:

"I had observed the incident at about 1900 hours Christmas Eve, 1951 at Harmon. I had personally reported to General Witten and in the next day or two days I proceeded to prepare a complete report which involved getting statements from some 20 people who had observed the incident. It was his impression that the report had been forwarded to Hq NEAC and to Hq USAF. His description of the incident is:

It was a clear, cloudless night with a full moon. Visibility excellent (greater than 30 miles) at about 1900. He and his family were on the way to the club when one of his youngsters called his attention to a white cloud having the consistency of a contrail which started very high to the right of the moon. As the contrail approached the earth it turned black, at one point in the contrail there was lateral displacement. A later check with the weather station indicated a wind shift ~~at~~ 18,000 feet. The contrail appeared to have come from outside the atmosphere down to the earth; the bearing was about 75° to 250° true. Two officers, Colonel Rosenbaum and ? Mitchel were flying a C-82 at this time, enroute to Harmon, they too observed the contrail and indicated that it disappeared into a white flash into the Gulf. "

*of*  
WAYNE L. O'HERN, Colonel, USAF  
Chief, Technical Analysis Division
